PRICE LIST TO BE USED IN MAKING INITIAL INVENTORY OF STORES AND FIXED PROPERTY IN ACCORDANCE WITH PARAGRAPHS 447 AND 448, "ACCOUNTING SYSTEM FOR THE U. S. INDIAN SERVICE."

NOTE.—All new (unused) items are to be taken up as stores. When issued for use all nonexpendable items are to be accounted for as fixed property and cards (Form 5–703) made for them.

All articles that have been in use should be inventoried, priced, and fixed property cards made and the value taken up as fixed property under the proper classification.

All articles in this list are expendable upon issue except those opposite which the letter "N" appears in column "Nonexpendable."

Fixtures, as desks, benches, etc., fastened to the floor or walls of a building should not be inventoried as stores or fixed property as their value will be included in "Buildings and Plant."

Discarded nonexpendable property (held pending condemnation) should not be included in this inventory, but the usual lists should be kept so that the old property return may be reconciled with the property records under the new system.
